

## The highlifter - quality at working height

The highlifter can transport and lift a pallet to the right ergonomic working height, and is very gentle to surroundings, pallets and goods. The highlifter has an elegant design with rounded corners.

The design prevents industrial injuries and strain on the user - focus is put on safety and ergonomic working conditions of the user. As an example, the ergonomically correct shape of the handle ensures a relaxed hold for the user.

## **Technical Specifications**

Loads of 1,500 kg can be transported and lifted up to 470 mm with the high-lifter. From 470 mm the lifting capacity is 1,000 kg.

Optimum user-friendliness

- low own weight
- central location of all control buttons
- ergonomic handle

Long operating life and low maintenance costs

- reliable cylinder construction
- strong construction
- use of quality materials

## Optimum stability

- low overall height
- fork length of 1200 mm
- supporting feet at steering wheel
- tandem wheels on scissors legs

The manual highlifter needs very low power for the pump function and has foot protection and neutral position.

The tandem wheels have a brake effect and are not hostile to the floor.

Ergonomic handle ensures the user a relaxed hold.

Level control (optional extra) ensures a constant working height.
